## about **R-404A replacements** in commercial refrigeration

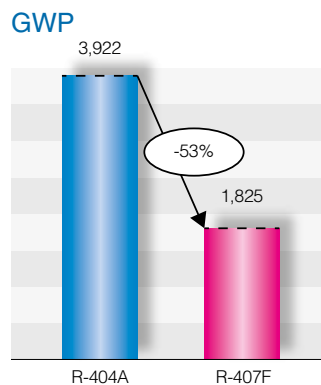

**1 Significant savings**  
Real life studies in supermarkets and refrigeration industry companies show that using Genetron Performax® LT (R-407F) can lead to energy savings between 8% and 15%, 10% savings on operating costs and 37% reduction in CO<sub>2</sub> emissions.

**2 F-Gas Ready**  
R-407F can be used until 2022 for new stationary refrigeration installations and for an unlimited time for servicing and maintenance.

**3 Easy to install**  
With minor adjustments, R-407F can be used in existing systems; you do not need to replace your entire refrigeration system.

**4 Safe to install**  
R-407F has the same safety classification as R-404A. It is safe for technicians and installers to use and handle, and it integrates seamlessly with their existing procedures and expertise.

**5 R-407F refrigerant delivers the lowest GWP**  
R-407F's global-warming potential (GWP) is 1,824, 53% lower than R-404A refrigerant (3,922), and lower than any existing commercial refrigeration alternative currently available in the market.

**6 Extensive homologation**  
R-407F has been qualified and approved by major refrigeration compressor, valve and other component manufacturers.

**7 Proven experience**  
R-407F provides ideal and time-tested solutions with the most widespread technology. More than 1,100 installations in Europe clearly prove that major European and global supermarket chains trust R-407F. They have ongoing plans to extend its use in their facilities for both new and retro-fit applications.

**8 Technology leadership**  
R-407F was developed by Honeywell, the world's leading refrigerant technology provider.

**9 More than just refrigerants**  
Honeywell has vast experience in technology of ancillary components for the refrigeration industry.

**10 Exceptional distribution capacity**  
R-407F has a proven role in today's commercial refrigeration market. It is sold through an extensive distribution and wholesaling network.
